MARCIN ZAREMSKI

FULL STACK DEVELOPER

SUMMARY

I have been working as a programmer since 2018.
By then I developed a few projects. I worked mainly with the frontend but sometimes with the backend side of the application. I love building a product as a whole - not only a technical aspect. I have a startup 🚀 mentality and I would like to help with your awesome project!

SIDE PROJECTS

Ikonate - Customize icons
The app was #1 **product of the day** 🎉 in Product Hunt.
It helps to custom and download icons in various formats.

Multiplayer Online Race Game
The game was built in 2017 just for fun (and learning).
I used 2d physic library, Pixi.js, Node.js, web sockets and JavaScript. Have a fun! (Control: w,s,a,d,space)

TECH STACK

- JavaScript
- TypeScript
- REACT
- Redux
- Node.js
- Express.js
- PostgreSQL
- SQL
- Storybook
- Docker
- HTML
- CSS

EDUCATION

Cracow University of Economics
APPLIED COMPUTER SCIENCE
10/2018 - 07/2021 - KRAKOW

Technical High School
COMPUTER SCIENCE - LUBACZOW
10/2018 - 07/2021

LANGUAGES

- Polish: Native Proficiency
- English: Professional working proficiency (B2)

WORK EXPERIENCE

Frontend - Part-time contract
BARBUCK/CALLTRACKS
07/2021 - PRESENT

I am in charge of:
- Separating REACT frontend from the backend to create a single page application.
- Implementing a Storybook for all components.
- Refactoring all migrated components.
- Creating unit and integration tests for the components.

Frontend - Fulltime
G2A
10/2020 - 07/2021

- G2A is a global online gaming marketplace.
- I worked in a team of 9 where we used scrum methodology.
- Developed new features for the client's dashboard in REACT and redux.
- Developed a few features in a micro-frontend approach

FullStack - Fulltime
FOUNDER & LIGHTNING/UCREATE
07/2018 - 10/2020

- We were building startups and technology for them.
- Gained experience by working on a few projects, working closely with project managers, designers and clients and leading from time to time.
- Around a year I worked as backend with Node.js, Express and PostgreSQL. It was a real estate project to find a perfect location to live. We worked closely with data scientists, designers and frontend devs.
- Another great experience I gained in a financial project where I was leading a frontend part of the application (REACT, Redux) with 3 frontend developers.
